

Northstar Meridian Group

Incident Response Policy

Document ID: SEC-IRP-009 | Owner: Security Operations | Version: 1.6 | Effective: 2026-07-26

Security and operational incidents must be triaged quickly and consistently.

Incident lifecycle:

- Detect and classify the event
- Contain the impact and preserve evidence
- Eradicate the root cause
- Recover services and monitor for recurrence
- Complete a post-incident review with actions and owners

Examples include malware, unauthorized access, data loss, fraud, and major service outages.

Escalation to Legal, Privacy, Customer Support, or leadership occurs when required.
